TRUE POWER LTD.

An ISO 9001:2015 Certified Company

What is Earthing?

Earthing is the process of creating an alternate path for the safe flow of fault/excessive current in the presence of minimum resistance or impedance.

Purpose of Earthing:

The primary purpose of earthing is to reduce the risk of serious electric shock caused by leakage of current in an insulated metal part of an appliance, power tool or other electrical equipment. In a properly earthed system, such leakage/fault current flows away harmlessly tripping the field. Over the years billions of dollars worth of property have been destroyed due to power failures, short circuits etc. caused by improper grounding systems.

*I have the honor of serving as the Managing Director of our esteemed company **True Power Ltd. Established in 2008**, we are an ISO certified electrical manufacturer and comprehensive solution provider with **3 world class manufacturing setups**, 8 exciting product verticals (Chemical Earthing, Lightning Arrester, Solar Panel, Solar Panel, Transformer, Wire & Cable, HDG Mounting Structure for SPD and Conductor).*

MD Desk

Having 10,000+ distributors, 25 service centres, 500 on-roll employees and 300 contractual staff has an International presence cutting geographies in Middle East, Africa, Nepal and Bangladesh, and has a wide presence across PAN India from Ladakh to Kanyakumari and from Kutch to Arunachal Pradesh. With our extensive coverage throughout India, we are able to deliver outstanding product services and guarantee customer satisfaction. We sincerely appreciate your decision to choose us as your reliable partner for all your electrical requirements. Thinking of your Safety and Health is our first priority. At the moment we are taking all recommended precautions to make sure we're doing everything to keep our community and country safe.

We provide customized, value-added, fit-in-budget solutions for Chemical Earthing, Lightning Protection, and Solar Power for diversified needs, and all scales of projects, from small residences to large palatial bungalows, from Government installations to high-rise towers, from airports to hospitals, from small manufacturing setups to world-class automatic large processing plants with microprocessors and microcontrollers based latest CNC machines.

Hari Om Tiwari

(Managing Director)

PRODUCT CODE:
GI-E-001

1-TP GI EARTHING ELECTRODE (STRIP IN PIPE)

Model	Length (Mtr)	Terminal Size	Inner Strip	Outer Pipe Diameter(min) mm
40 MTPG	1,2&3	40X6	25X3	48
50 MTPG	1,2&3	40X6	25X3	58
80 MTPG	1,2&3	50X6	25X3	88

- Hot dip galvanized for corrosion protection
- Designed for fast fault current dissipation
- Low maintenance on site
- Easy & Fast installation on site.
- The correct balance is where the soil pH is between 5.5 and 7.5, so every effort should be taken to check soil pH levels regularly
- Moisture booster chemical bags provided for low earth resistance

PRODUCT CODE:
CT-E-005

2-TP COPPER TERMINAL EARTHING ELECTRODE

Model	Length (Mtr)	Terminal Size	Inner Strip	Outer Pipe Diameter(min) mm
40 MTPCT	1,2&3	40X6	25X3	48
50 MTPCT	1,2&3	40X6	25X3	58
80 MTPCT	1,2&3	50X6	25X3	88

- Hot dip galvanized for corrosion protection
- Designed for fast fault current dissipation
- Low maintenance on site
- Easy & Fast installation on site.
- The correct balance is where the soil pH is between 5.5 and 7.5, so every effort should be taken to check soil pH levels regularly
- Moisture booster chemical bags provided for low earth resistance

PRODUCT CODE:
CE-E-003

3-TP PURE COPPER EARTHING ELECTRODE

Model	Length (Mtr)	Terminal Size	Inner Strip	Outer Pipe Diameter(min)
40 MTPPC	1,2&3	40X6	25X3	40
50 MTPPC	1,2&3	40X6	25X3	50
80 MTPPC	1,2&3	50X6	25X3	80

- Used 99.9% copper for long life.
- Designed for fast fault current dissipation.
- Low maintenance on site.
- Easy & Fast installation on site.
- The correct balance is where the soil pH is between 5.5 and 7.5, so every effort should be taken to check soil pH levels regularly
- Moisture booster chemical bags provided for low earth resistance.

PRODUCT CODE:
BC-E-002

4-TP COPPER BONDED EARTHING ELECTRODE

Model	Length (Mtr)	Terminal Size	Inner Strip	Outer Pipe Diameter(min) mm
40 MTPCB	1,2&3	40X6	25X3	48
50 MTPCB	1,2&3	40X6	25X3	58
80 MTPCB	1,2&3	50X6	25X3	88

- Long Life.
- Enhance Conductivity.
- The correct balance is where the soil pH is between 5.5 and 7.5, so every effort should be taken to check soil pH levels regularly
- Tested from NABL & CPRI lab.

PRODUCT CODE:
GI-PIP-E-006

5-TP GI PIPE IN PIPE EARTHING ELECTRODE

Model	Length (Mtr)	Terminal Size	Inner Pipe	Outer Pipe Diameter(min) mm
40 MTPPG	1,2&3	40X6	20	48
50 MTPPG	1,2&3	40X6	25	58
80 MTPPG	1,2&3	50X6	40	88

- Hot dip galvanized for corrosion protection
- Designed for fast fault current dissipation
- Low maintenance on site
- Easy & Fast installation on site.
- The correct balance is where the soil pH is between 5.5 and 7.5, so every effort should be taken to check soil pH levels regularly
- Moisture booster chemical bags provided for low earth resistance

PRODUCT CODE:
PC-008

6-TP PVC Earth Pit Cover, Cast Iron Earth Pit Cover For Earthing

PVC Earth Pit Cover					
Model	At Top	At Bottom	Height	Load Capacity	Weight
MTPBG	310	250	260	5000	0.970gm
MTPSM	215	165	210	3000	0.390gm
MTPQR	250	300	260	4000	1.800gm
Cast Iron Earth Pit Cover					
Model	Height		Width	Weight	
MTPCI1	450		450	7.160gm	
MTPCI2	300		300	3.310gm	

- Factory-built access ports on two sides for easy wire/strip access.
- Green top cap blends with the environment.
- Made from durable polyethylene for longevity.
- Guarantees long-term use.
- Resistant materials ensure durability in tough conditions.

PRODUCT CODE:
BF-C-007

7-TP BACKFILL COMPOUND

Quantity		No. Of Bags
25 kg.		1
15 kg.		1
5 kg.		1
Backfill Compound Type		
Marconite base	Silica Base	Bentonite Base

- Non toxic content
- Resistivity less than 0.2 ohm-water
- Its maintain conductivity without continuous presence of Maintenance
- Tested from NABL accredited lab

PRODUCT CODE:
CSC-LA-010

8-TP COPPER SPIKE/COPPER LIGHTNING ARRESTER

Diameter	Length
16mm (Solid Rod)	1 mtr, 2 mtr, 3 mtr
25mm (Hollow Pipe)	1 mtr, 2 mtr, 3 mtr

- Standard : IEC - 62305 Part III
- Material : Copper / Copper Bonded / GI
- Technology : Conventional Type LA As Per IES 62305 Part III

PRODUCTS

PRODUCT CODE:
COST IRON-009

9-TP CAST IRON EARTHING PIPES

MODEL	Length of Electrode (in Meter)	CONNECTION TERMINAL SIZE (MM)	Funnel Size
80 MTPCIEP	1,2 &3	300X50X6	100
100 MTPCIEP	1, 2 &3	350X50X6	100

PRODUCT CODE:
TRIPOLAR E-010

10-TP TRIPOLAR & TRIPOD ELECTRODE

MODEL	LENGTH, Mtr	INTER CONNECTION STRIPE	OUTER ROD DIA (min) mm
MTPTP	1, 2&3	25X3	17.2
MTPTP	1, 2&3	25X3	17.2

- Copper Bonded With A Coating Thickness Of 250+ Microns.
- Provides High Electrical Conductivity And Anti-Corrosion Properties.
- Lowest Resistance Values Even With A Single Earth Pit.
- Greater Safety And More Reliability.
- Maintenance Free , Easy Installation, Long Service Life.
- An Exceptional Earthing System Suitable For All Types Of Soil.

During a storm, when propagation field conditions are favorable, an ATS (Truepower)ESE air terminal will generate upward leader. This upward leader from the airterminal tip propagates towards the downward leader from the cloud at an average speed of 1-2 m/μs.

This emission of an early streamer to a lightning event delivers a beneficial triggering time compared to a single rod air terminal exposed to the same conditions. The beneficial triggering time is determined as the average time gained at the moment of sparkover, with efficiency confirmed by high-voltage laboratory testing from international acclaimed lab. All ESE tests are defined in Annex C of the French standard NF C 17-102 (2011 Version).

The radius of protection Rp of an ATS is given by French standard NF C 17-102 (September 2011 edition).

It depends on the ESEAT efficiency ΔT of the ATS measured in the high voltage laboratory, on the levels of protection I, II, III or IV calculated according to the lightning risk assessment guides or standards (NF C 17-102 annex A and on the height h of the lightning air terminal over the area to be protected (minimum height = 2 m).

The protection radius is calculated according to Annex C in French standard NF C 17-102. For ATS -3 limiting the value of ΔT used in the protection radius calculations to 60 μs (limited 60 μs in accordance with the paragraph 5.2.2 of the NF C 17-102 standard).

Protection Calculation

The protection radius of Protector is calculated by the standard formula given in the French Standard NFC 17-102(Sept. 2011). The formulation is based on the lightning conductor triggering advance (ΔT), Installation height (h) and the triggering distance (ΔL).

$$R_p(h) = \sqrt{2rh - h^2} + \Delta(2r + \Delta) \text{ for } h \geq 5 \text{ m}$$

And

$$R_p = h \times Rp5/5 \text{ for } 2 \leq h < 5 \text{ m}$$

Where h= ESE height relative

To the area being protected (m)

Rp5=value of Rp from Eqn. (1) when h=5m

r=20 m for protection level I (Very High Protection)

30 m for protection level II (High Protection)

45 m for protection level III (Medium Protection)

60 m for protection level IV (Standard Protection)

- To control, Radio Frequency (rf) Emissions and Electromagnetic Interference.
- To provide a stable Potential difference for the accuracy of Instruments.
- To provide a Safe Discharge path for Short circuits and Lightning Strikes.
- Grounding helps protect electrical and electronic equipment from voltage and lightning strikes.
- This is particularly important in sensitive electronic circuits and communication systems.
- This helps protect people from electric shock hazards.
